Neil Peart's [original Slingerland drum kit](#) (which he used from [Fly By Night](#) through [2112](#)) was [put up for auction on eBay a couple of months ago](#) and ended up [being sold for](#) over \$25,000. Ever since the purchase Michael of [NeilPeartDrumsticks.com](#) has been working with the new owner of the kit to help restore it to a playable condition so it could be put on display. I'd [mentioned on Friday](#) that Michael had finally released all the details regarding when and where the kit would be displayed. The kit will be at the upcoming Percussive Arts Society show ([PASIC](#)) in Indianapolis the week of November 11-14 and people will even be able to play the kit themselves with a donation of \$10 to the [American Cancer Society](#) for 1 minute on the kit.
